Descriptions:

Mt. Shennongjia- Shennongjia Nature Reserve, established in 1982, lies in northwestern Hubei Province and occupies an area of 70,467 hectares, with 96 percent forest coverage. It was approved as a national nature reserve in 1986 and joined the UNESCO Man and Biosphere Program in 1990. Due to the

special geographic conditions and effects of glacial motion, Shennongjia Nature Reserve contains many ancient, rare and endemic plants.

Three Gorges Dam , the largest water conservancy project ever

undertaken by man and it has been a dream for several generations of Chinese people. The construction of the dam formally began in 1994. The body of the dam was completed in 2003, and the whole construction was completed in 2009. It is 2,335 meters long, 185 meters high, 18 meters wide on the top and 130 meters wide at the bottom.
